1. Business Objective

The business needs a performance tracking report for advertising campaigns running on Facebook and Instagram. The report provides visibility into campaign reach, engagement, conversions, and budget utilization.

This enables the marketing team to:

- Identify the most effective platform — Facebook vs Instagram.
- Track campaign ROI and optimize budget allocation.
- Understand audience engagement patterns.

2. Scope of the Report

In Scope

- Campaigns running on Facebook and Instagram only.

Out of Scope

- Other platforms such as Messenger and Audience Network.
- Organic engagement — only paid ads are included.

3. KPIs & Definitions

Impressions

Definition:

Number of times ads were displayed to users.

Formula:

Count of event_type = Impression

Example Use:

Measure campaign reach.

Clicks

Definition:

Number of times users clicked on ads.

Formula:

Count of event_type = Click

Example Use:

Measure engagement intent.

Shares

Definition:

Number of times ads were shared by users.

Formula:

Count of event_type = Share

Example Use:

Measure viral engagement.

Comments

Definition:

Number of user comments on ads.

Formula:

Count of event_type = Comment

Example Use:

Measure user sentiment and feedback.

Purchases

Definition:

Number of purchases made after seeing ads.

Formula:

Count of event_type = Purchase

Example Use:

Measure conversions.

Engagements

Definition:

Total interactions including Clicks, Shares, and Comments.

Formula:

Clicks + Shares + Comments

Example Use:

Measure overall engagement volume.

CTR — Click Through Rate**Definition:**

Percentage of impressions that resulted in clicks.

Formula:

(Clicks / Impressions) x 100

Example Use:

Measure ad effectiveness.

Engagement Rate**Definition:**

Percentage of impressions that resulted in engagements.

Formula:

(Engagements / Impressions) x 100

Example Use:

Measure overall ad appeal.

Conversion Rate**Definition:**

Percentage of clicks that resulted in purchases.

Formula:

(Purchases / Clicks) x 100

Example Use:

Measure funnel efficiency.

Purchase Rate**Definition:**

Percentage of impressions that resulted in purchases.

Formula:

(Purchases / Impressions) x 100

Example Use:

Measure conversion from reach.

Total Budget

Definition:

Total spend allocated to all campaigns.

Formula:

Sum of campaigns.total_budget

Example Use:

Cost analysis.

Avg Budget per Campaign

Definition:

Average budget allocation per campaign.

Formula:

Total Budget / Campaign Count

Example Use:

Measure budget distribution.

4. Charts Requirements

1. Target Gender — Donut Chart

A donut chart visualizes performance split by target gender from the ads table.

- The metric displayed such as Impressions, Clicks, or Purchases changes dynamically via a parameter.
 - Purpose: Identify which gender segment contributes most to the selected metric.
-

2. Target Age Group — Bar Chart

A bar chart shows engagement across age groups defined in the ads table.

- Each bar represents one age group.
 - The metric displayed switches dynamically.
 - Purpose: Highlight which age group is most responsive to campaigns.
-

3. Country — Map

A map visualization displays performance by country from the users table.

- Bubble size or color intensity represents the selected metric.
 - Purpose: Provide a geographic view of campaign reach and engagement.
-

4. Calendar Month — Calendar Heat Map

A calendar heat map plots performance at the monthly level based on the timestamp field.

- Darker shades indicate higher activity.
 - Purpose: Detect seasonal trends, peak ad months, and low-activity periods.
-

5. Weekly Trend — Stacked Column by Ad Type

A stacked column chart displays weekly performance trends.

- X-axis shows week number from the Date Table linked to ad_events.
 - Stacks show different ad_type values from the ads table.
 - Y-axis shows the selected metric.
 - Purpose: Compare ad type contributions over weeks.
-

6. Hourly Trend — Area Chart

An area chart shows activity by hour of day from ad_events time_of_day field.

- X-axis shows hour of the day from 0 to 23.
- Y-axis shows the selected metric.

- Purpose: Understand user activity patterns throughout the day.
-

7. Ad Type — Matrix

A matrix visualization shows the selected metric across ad types broken down by platform.

- Rows show Ad Types.
 - Columns show Platforms or other campaign dimensions.
 - Values show the selected metric.
 - Purpose: Compare performance across ad formats and platforms side by side.
-
